

SAMPLE PROJECTS

California Office of Emergency Services:

System Integration project: Mounted 14 of the 55' adjoining NEC displays at CalOES.

Software Engineer completed the network testing and software implementation of Hiperwall and LexRay software.

CBS:

Installed (4) cables to (111) work stations across (3) floors.

Installed "J-HOOK" cable pathways above the ceiling on each of the (3) floors, Installed fiber (single-mode and multi-mode);

Rod/rope underground structure.

Walmart:

Installed 4 self-check out stands. Installation of conduits, testing electrical connections for each SCO lane.

Mounted power poles

Installed new data cables to existing switches. Other sample projects include moving cash registers where our data technicians worked with electricians.

UCLA/USC Hospitals:

Racked and stacked of new switch. Installed and cross connected of the existing network to new switches. Switches were installed, connected, and tested before any patient connections were made. 17,000 connections were completed without noticeable impact to patient care.
